WHERE: APRA
1300 First Street, NE
Room 260B

DATES: October 11, 2013

TIME: 9:00AM – 4:00PM

COST: FREE

CONTACT HOURS: 6
NAADAC

COURSE DESCRIPTION:

Utilizing the Addiction Severity Index (ASI) to Make Required Data Collection Useful. The Addiction Severity Index (ASI) is one of the most universally used instruments for the assessment of substance abuse and related problems. This Blending product is designed to address how to transform required paperwork into clinically useful information. Addiction counselors administer the ASI, yet often fail to use its findings. To assist clinicians, supervisors, and managers with utilizing the ASI results more readily, this product addresses the key tenets of treatment objectives and interventions—Measurable, Attainable, Time-Limited, Realistic, and Specific—referred to as Treatment Planning M.A.T.R.S.

TRAINING OBJECTIVES:

- Examine how ASI information can be used for clinical applications and assist in program evaluation activities.
- Identify differences between program-driven and individualized treatment planning processes.
- Gain a familiarization with the process of treatment planning to include the TAP Assessment (Treatment Assignment Protocol).
- Define basic guidelines and legal considerations in documenting client status.
- Provide opportunities to practice incorporating the ASI information in documentation activities through use of the ASI Narrative Report and case examples.

Space is limited. Maximum 25 participants per day!
